

# Alternative Pathways to Graduation

SENIA International is thrilled to be partnering with inclusive leaders to create a standardized, supportive, and comprehensive pathway for students who may not fit into traditional academic tracks, ensuring they are prepared for their futures.

Dropping in March 2025, this project will feature resource links, sample documents, and exemplars to guide schools in developing tailored graduation pathways, ensuring all students have opportunities for meaningful qualifications and future success.

As we work towards this goal, we want to support schools who are looking for immediate resources to support their students NOW as they explore post-secondary pathways. The following resources were just too good to wait to share:

As per their website, "Think College provides resources, technical assistance and training related to college options for

students with intellectual disability, and manages the only national listing of college programs for students with intellectual disability in the United States." Check it out at <https://thinkcollege.net/>

JoinIN, established by the Erasmus+ Project of the European Union through the "Inclusive Postsecondary Education [IPSE] Programme for Students with Intellectual Disabilities," offers extensive information on IPSE programs for students and their families. Additionally, their website aids the development of a

European network of universities by providing practical information for professionals on current and emerging programs across Europe. You can learn more at <https://joinin.education/>

NATIONAL CENTER FOR  
COLLEGE STUDENTS  
WITH DISABILITIES

The University of Minnesota's National  
Center for College Students with

Disabilities (NCCSD) is the only federally-funded national center in the U.S. dedicated to providing information and resources for future and current college students with disabilities. This includes those enrolled in part-time programs and graduate studies. The NCCSD supports students, their families, educators, and anyone seeking guidance on disability and higher education. Please visit <https://nccsd.ici.umn.edu/> for more information.
